

Mid-Atlantic Bargaining Report # 10

July 15, 2015

The Mid-Atlantic Bargaining Committee met with the company today and passed proposals that affect the quality of life issues that our members face on a daily basis in the work place. Our proposals focused on providing increases in time off and greater flexibility to the membership when scheduling and taking time off the job. The union also requested data associated with the Electronic Recording of Calls, Medical Restrictions and Adherence and Handling Time.

Your bargaining team understands the stressful working conditions members work under every day. We will continue to push your agenda throughout this process and will introduce additional proposals directed at improving the working conditions for all members across Mid-Atlantic.

We appreciate all of the mobilization activities Locals are conducting daily. Every member should engage in some mobilization activity to show this greedy company IT'S OUR TURN!

The Balls keeps bouncing and our GFY is fully functional!
